GET TO KNOW JAYTEX

Jaytex Constructions specialise in medium to large scale commercial construction projects ranging from \$2 - \$80 million. With every project demonstrating a high level of detail and quality, the Jaytex Constructions team has emerged as a progressive, dynamic force in Darwin's construction industry in recent years. We offer unmatched versatility born from 20 years' of diverse experience in the industry, a desire to offer something better, and our strong relationships with the local Darwin community.

We are a multiskilled team that offer complete design and build solutions including large span industrial facilities, commercial showrooms, office spaces, retail and office fit-outs, and new land subdivisions. We can even help you acquire and develop land in one streamlined package of work, eliminating the headache of extra administrative steps.

Our team takes pride in being reliable at every point of the process. We get to know our clients, are hands on and responsive. Understanding your business means we understand the space you need and how you need to use it. Our designs are a blend of our experience in maximising space, understanding the Northern Territory's extreme climate, your unique requirements, and our signature modern, clean aesthetic.

We work closely with investors and developers, creating conceptual and construction solutions that make an impact.

We create spaces that meet both yours and the property market's needs, now and into the future. Offering flexibility and endless innovation, we never replicate but always push to find new, better solutions and concepts to consistently deliver first-class projects.

OUR ORIGIN STORY

OUR HISTORY

Jaytex Constructions has evolved from one man with a ute and a wheelbarrow into an award-winning construction company with a rich 20-year history. It is a company defined by exceptional financial capacity, impeccable reputation for fair dealing and a cooperative and flexible approach to contractual relations.

Our managing director Brett Dixon started with concreting driveways and paths. However, it wasn't long before he had completed a kerbing project at the Darwin International Airport and expanded his business into Asia. Now, Jaytex Constructions is building key multimillion dollar projects and are a leading Territory business who focuses on local employment. It's a legacy we take pride in.

Jaytex was built on trust, integrity, transparency and family spirit, which has been core to its success. These company values are the same now as when Brett established the business in 1997. This is testament to the culture of respect and dedication you'll find at Jaytex Constructions.

Under Brett's leadership Jaytex has gone on to win several HIA awards and continues to go from strength to strength. With a business model built on transparency and integrity Brett and our team have established a company that clients return to because they know our word and our work can be 100% trusted.

QUALITY. TIMELY. COMPETITIVE.

OUR CAPABILITIES

Jaytex Constructions commits to delivering every structure to the highest standard. With local knowledge and industry experience, we bring a strategic eye to your project, meeting challenges head on and adding value at every step.

Our portfolio boasts a diverse range of projects ranging from \$500k to \$85m. With the ability to work across all sectors and demonstrated experience in commercial and residential high-rise, health, education, retail, and aged care (to name a few), you're always in capable hands.

We ensure buildability, without compromising quality or design. High quality doesn't have to mean high cost and we work with our clients to make sure they are getting the best possible value. Our commitment and enthusiasm towards building the Top End means we source local suppliers and products for all of our projects whenever possible.

We work with developers, owner/occupiers, investors and local and state Government departments to create attractive spaces that enhance the Darwin community. With a proud Northern Territory heritage, Jaytex Constructions have many years of delivering complex builds for a variety of clients across Australia.

Our capabilities include:

- Construction
- Project Finance
- Civil Works
- Cost Planning & Feasibility Studies
- Design & Construct
- Quality Assurance
- Early Contractor Involvement
- Land subdivision

You want to make your mark. You want a builder you can trust. We have the tools, know-how and experience to help you get it done and a track-record of complex projects and happy clients.

FINANCIAL STRENGTH

Our solid portfolio of high quality projects and long list of satisfied clients gives us reason to be justifiably proud of our capabilities. We have worked together as a team to build a strong balance sheet over the past 20 years and have a CAL accreditation for works \$20m plus. You can have absolute confidence in the quality execution and completion of your projects with Jaytex, large or small.

AGILE

We are nimble and can respond quickly to changes in projects as required by our clients, whether that's starting a project quickly, or a changing program or design. Flexibility and responsiveness is how we've built a base of happy clients. Our clients have access to the ultimate decision makers and we are not constrained by layers of red tape, if you want something 'out of the box', we make it happen.

MANAGEMENT APPROACH

Our approach is all about giving you a smooth and easy experience. The same team that quotes your work will be the same team to deliver your work. You won't get passed from division to division and important details won't be missed or forgotten. A single point of contact brings transparency and reliability you can trust.

TRANSPARENCY

We are open and honest. We are in the business of client satisfaction so we do not try to win a job at any and all costs. We will never take on a job knowing there are issues with drawings or details, with the intention of charging the client with a variation after the contract is awarded. If we see an issue, we bring it to the client's attention up front and help them work through it.

Jaytex will always give you the opportunity to view proposed layouts and costs, and change details beforehand to ensure that you get the place and space that is right for your business.

OUR EXPERTISE

OUR POINTS OF DIFFERENCE

WE ARE NOT LIKE OTHER BUILDERS

WE LISTEN

You have a vision for your project. It's our job to get you there. In the past you may have felt steamrolled by builders who don't listen. You won't find that attitude here. We work through your needs and pay attention to your special requirements. In addition to advice on buildability and cost we'll also look for improvements and alternatives that will help add value.

WE EXPLAIN

We don't gloss over matters with technical speak, but take the time to explain things like buildability, program scheduling and risks in detail. Our team help clients understand all costs, potential pitfalls and potential cost savings. We pride ourselves on bringing our clients with us on the journey and keeping them informed and up-to-date from start to finish.

WE DELIVER QUALITY

We do not try save a dollar by cutting corners and covering it up behind finished works; we do not 'water down our paint'. Our team takes pride in delivering a quality, lasting product that makes an eminent mark on the Darwin landscape.

Quality is what we've built our reputation on. And the reason you can count on the quality of our work is the quality of our people. Jaytex Constructions fosters an open and collaborative culture, so our people are empowered to take responsibility for the quality and outcome of their work. Our team are more than just skilled and experienced, they genuinely care about getting it right.

WE ARE SAFE

Safety is our driving principle. It's everyone's responsibility, whether on site or in the office. We deliver a unique Work Health and Safety plan for every project to identify, manage and mitigate risk, and all our safety processes comply with AS 4801.

Our safety culture has been forged from the top down, with our managing director often attending on site inspections, leading our commitment to safety by example. We are determined to not only meet, but exceed industry standards, engaging external safety firm HSEMA to oversee and regularly audit our safety processes and update management on changes in regulation.

WE RESPECT THE ENVIRONMENT

We value the environments that we build in. We are careful, we clean up after ourselves and we work to recognised, certified standards, including ISO 14001. Unique Environment Project Plans are created for every development to ensure everything, from soil erosion, waste, noise, dust, weed, and water management, is considered and minimised.

Our exemplary environmental policy and management system is readily available and regular staff and contractor training is conducted to ensure we all understand our responsibilities and statutory obligations.

On an administration level we take up initiatives that minimise our impact on the environment. We are an active collection centre for Cartridges 4 Planet Ark and FluoroCycle (lamps that contain mercury). We also dispose of leftover paint and paint packaging via Paintback, which funds research to find better uses of unwanted paint. We lead by example and encourage all our subcontractors to respect the environment, support these initiatives and reduce their environmental footprint.

WE'RE PROUD LOCALS

We believe in investing in people, in our community and we take every opportunity to develop the local economy. As Darwin locals we take great pride in working with the community to make our shared home a better place. Jaytex is passionate about upskilling local people and creating a more equitable construction industry in the NT. Our trainee and apprenticeship program for young Indigenous people interested in a career in construction is just the first step of our long-term Indigenous Engagement Plan.

Darwin a unique, friendly, and welcoming place and volunteer, community-run organisations are the backbone of this great culture. Jaytex is proud to play our part in this community, supporting many local events and organisations.

We are proud sponsors of the annual Special Children's Christmas Party in Palmerston, helping make disadvantaged and disabled children's Christmas dreams come true. We also offer regular support to:

- RSPCA Darwin
- Bryce Fullwood Racing
- Banks Bulldogs Football Club
- Movember Foundation
- Young Diggers Association

MEET THE TEAM

OUR PEOPLE

The Jaytex way of doing business is to put people first. Integrity, openness and honesty - that's how we work with our clients, our suppliers and our people. Our reputation is built on trust and we have developed strong relationships in the Darwin through our collaborative approach. We employ local people, subcontractors and suppliers, as part of our commitment to enriching the local economy and continue to improve and extend our great relationships with individuals and businesses across all industries in the Territory.

Our staff are the reliable, trusted experts, friends and advisers that make Jaytex the exceptional company that it is. We think we have the best people and we take

steps to make sure we do - each Jaytex staff member is encouraged and supported to undertake 60 hours of professional development and training every year. Jaytex encourage a love of life-long learning, continuous improvement and innovation.

With extensive construction and project management experience our management team has many years' experience working within the local industry and unique Top End climate. Our team brings a diverse and robust mix of skills, including multiple trade and specialist qualifications.

DIRECTOR

BRETT DIXON

Experience

35 years

Qualifications

- Licensed builder
- Entrepreneur

From laying concrete kerbing in Mildura to establishing one of the Northern Territory's most successful businesses, Brett Dixon has always been driven to be his own boss. As someone who has thrived on the challenge of succeeding in a sometimes unrewarding economy, Brett truly understands the highs and pitfalls his clients face and works side by side with them to help them succeed.

His entrepreneurial interests extend past Jaytex Constructions to kerbing, real estate, property management, motorcycle dealerships and race horses, spanning Australia, Asia and Canada. Happily based in Darwin for many years, Brett is a committed member of the local community and chairman of the Darwin Turf Club.

Brett's professionalism and integrity go back to the days when a handshake was as solid as a written contract. That's how Brett still does business - with transparency and respect. It's this 'open book' approach to leadership that has fostered a successful and supportive culture at Jaytex Constructions.

MANAGING DIRECTOR

MATTHEW MOSS

Experience

12 years business management

Qualifications

- Diploma in Property Services – REINT (current)
- Masters of Property Development – University of Technology Sydney (current)
- Post graduate degree – Institute of Chartered Accountants Australia
- Commerce degree

Matthew is a true professional with over a decade's experience in providing strategic and operational advice to large corporations and smaller enterprises. He oversees the financial stability, risk, operating procedures, systems, and board reporting. Energetic, motivated, professional, excited by challenge and solution-focused, Matthew's dedication and abilities have been recognized by numerous prestigious organisations. He looks forward to helping more developers make their mark in the Territory.

PROJECT MANAGER

CHRIS PULMAN

Experience

20+ years in the construction industry

Qualifications

- Certified Practicing Project Manager (CPPM)
- Diploma of Project Management
- Australian Institute of Project Management Member
- National certificate Civil Engineering and the Built Environment

Chris has worked in many roles including design, design management and commercial project management. An asset to any build, Chris is always on the look out for efficiencies and innovation that improve outcomes for the client and project team. His innovative and solutions-focused approach, coupled with his experience working on a number of significant construction projects gives Chris exceptional insight and foresight for any build.

CONSTRUCTION ESTIMATOR

NATHAN BENNETT

Experience

10 years in the building and construction industries

Qualifications

- Diploma in Building and Construction (registration)
- Cert IV in Estimating Building and Construction

Applauded from the start of his career, Nathan's dedication to quality has been unwavering throughout his various roles. Nathan also brings with him valuable local insight and industry knowledge, and is well respected as an employee and self-employed contractor in construction, in management and in government. Nathan brings a bevy of understanding to your individual project and the Jaytex team.

SITE MANAGER

NIGEL WRIGHT

Experience

15 years commercial construction

Qualifications

- Diploma in Building and Construction
- Certificate IV in Building and Construction

Nigel has worked in the construction industry for almost two (2) decades and has extensive knowledge and experience in various roles from leading hand and site foreman through to site manager, even running his own construction company. With a commitment to safety and exceptional communication skills, Nigel is an asset to our team.

Nigel has delivered large scale commercial projects in Darwin and remote areas across Australia. Although he only recently joined our team, Nigel is proving his extensive experience and diverse skill set enable him to work within project timeframes and limitations. He also shares our high quality and safety standards.

CONTRACT ADMINISTRATOR

CLAIRE MORAN

Experience

10 years contract management

Qualifications

- Associates Degree in Civil / Construction Works
- National Certificate in Construction Studies

Claire has undertaken many roles within the construction industry since 2000, commencing as a Junior Engineer and moving on to Estimator and Quantity Surveyor then gaining extensive experience as Contract Administrator.

Claire only joined our team recently but shares our high standards and has settled into our business culture well.

SITE FOREMAN

TIM HOCKING

Experience

12 years commercial construction

Qualifications

- Certificate III General Construction
(Carpentry-Framework / Formwork / Finishing)
- Elevated Work Platform
- Working Safely at Heights
- White Card

Since joining our team Timothy has demonstrated he is a strong communicator and is driven to achieve success.

Timothy has worked on a number of local large scale commercial projects, including Coolalinga Central Shopping Centre for Gwelo Developments. Timothy has extensive experience working closely with local subcontractors, maintaining safety standards on site and communicating with the client.

QUALITY ASSURANCE

Jaytex Constructions works to a quality management system that meets the requirements of Australian and international standards including AS/NZS ISO 9001:2008.

ENVIRONMENTAL MANAGEMENT

An Environment Project Plan that meets the recognised standards of ISO 14001:2004 is created for every Jaytex development.

WORK HEALTH AND SAFETY MANAGEMENT

Jaytex Constructions' Occupational Health, Safety & Welfare (OHSW) Policy recognises our moral and legal responsibility to provide a safe and healthy work environment for employees, contractors, customers and visitors and meets the Occupational Health, Safety and Welfare Act 1986, OHSW Regulations 1995 and the Workers Rehabilitation and Compensation Act 1986.

ASSURANCE AND SECURITY

FEATURED PROJECTS

Take a look at our award winning projects, and ask us how we can build you something of enduring value.

631 STUART HIGHWAY, BERRIMAH (STAGE 1)

DARWIN CORPORATE PARK

Budget	\$45m
Client	Berrimah Holdings
Completion	2015
Size	10,000 sqm

Darwin Corporate Park is already being hailed by the business media as setting a new standard in commercial hubs in northern Australia. Top-flight companies have jumped at the opportunity to secure their tenancy in the most strategic location in Darwin. Consisting of eight 3-story buildings and 300 secure basement car parks, Darwin Corporate Park solidly provides for Darwin's growth.

Jaytex's impressive financial capacity, coupled with experience in fund management and cost control, instilled confidence in the client. Partnering with trusted contractors, such as national consulting firm, Lucid, who undertook the electrical, mechanical and hydraulic design, Jaytex confidently delivered the project within budget to the required quality standards.

With a connective, free-flowing style, the fully landscaped park delivers dual benefits, offering attractive highway curbside appeal for prospective tenants and seamless business-to-business dealings within the hub.

This iconic Park was not without its challenges. To meet deadlines Jaytex had to excavate basements during the Darwin wet season. Darwin gets almost six times more rain than the southern states meaning prospective basements turn into muddy swimming pools. Jaytex engineered a solution, using a continuous pumping system to remove the water as it fell. Special measures to control sediment and other environmental issues were also identified and carried out by our highly trained team.

Newest technology provides uninterrupted connectivity with NBN throughout. A 5.5 star NABERS rating is the aim and the expectation for this exceptional build and Jaytex are proud to have poured our blood, sweat and skills into Darwin's future.

GULF CENTRE

Budget	\$12m
Client	Gulf Transport
Completion	2013
Size	5,000 sqm

The Gulf Centre was the brainchild of local family who saw an opportunity to capitalise on a key Darwin location. This speculative build required more flexibility than normal builders can handle, and more client support than most builders will give. At Jaytex we relished the opportunity to help a local family build their investment portfolio, which additionally supported local businesses by offering desirable yet uncommon spaces.

Working with one existing structure Jaytex applied its ingenuity to seamlessly weave five new buildings in and create an array of mixed-use spaces that satisfy a wide cross-section of businesses. The boutique offices cater for small office users through to showroom and light industry needs, and collectively form the Gulf Centre.

The client appreciated the benefits and ease of Jaytex's build solutions and great community connections, which we continued to tap to get the best result for the client. Jaytex collaborated with Concept Designs' George Savis, known for his beautifully designed builds across Darwin, to deliver an attractive, detailed and practical development.

Without knowing the exact end product, we focused on future proofing the development. We provided extra conduits and power- and water-meter panels to deliver a world of possibilities and designed user-friendly spaces for prospective tenants.

The flexibility Jaytex enabled throughout this project was unparalleled. As always we maintained full transparency regarding any variations to original works. Understanding the needs of the client, we completed sections of the build to accommodate leases being signed simultaneously; 60% of spaces were leased by the end of the build and 80% less than two months later.

This diverse and specialised build used our full range of services – detailed design, project management and quality construction – to bring to Darwin an individual yet detailed, multi-use centre that will be a stalwart for generations to come.

637 STUART HIGHWAY, BERRIMAH

NT MOTORCYCLE CENTRE

Budget	\$8m
Client	NT Motorcycle Centre
Completion	2013
Size	2,500 sqm

Before the NT Motorcycle Centre came to Jaytex they worked on top of each other out of a hot tin shed. They were out of space, the building didn't cater for their business and the layout was inefficient. Knowing Jaytex's experience with custom builds, innovative solutions and amicable staff they were the obvious choice for the job.

Working intimately with the client Jaytex brought their extensive experience in design and construction and reinvention in the retail sector to bring to life the best motorcycle shop in Australia.

Not one to dismiss quality and style for convenience, Jaytex emphasised the unique fittings – an innovative air-conditioning solution, internal used-oil collection point and exhaust removal system – to seamlessly unite the highly specialised requirements for bike servicing with attractive design and practical workshop flow. The exceptional custom design delivered a beautifully integrated solution for NT Motorcycle Centre's office, showroom and warehouse elements, wowing the interstate Harley Davidson franchise members.

Jaytex proved their willingness to go above and beyond to deliver projects to clients' tight deadlines when the Epoxy Seal for the NT Motorcycle Centre's polished concrete floors was delayed. What did they do? The Jaytex team jumped on a plane to Sydney and brought it back in check-in luggage, much to the confusion of the airline staff.

With their new purpose-built space the NT Motorcycle Centre has increased its productivity, has room to grow and delivers a first class experience for both customers and staff. This unique build highlights what can be achieved with Jaytex constructions at your side.

641 STUART HIGHWAY, BERRIMAH

BERRIMAH BUSINESS CENTRE

Budget	\$5m
Client	Sol no. 3 (investment syndicate)
Completion	2015
Size	2,000 sqm

Flexibility was key to this development so that the owners could offer a great range of options for potential buyers. The Berrimah Business Centre is 20 strata titled units located on Stuart Highway frontage in Berrimah.

Jaytex undertook the design and construction, also supporting the owners through the fire decompartmentalisation requirements to achieve certification of occupancy for the Berrimah Business Centre complex design.

Above and beyond the design and construction, the support and critical knowledge provided by Jaytex ensured that the owners were across building and tenancy fire hazard codes and requirements to achieve certification of occupancy for the complex.

With a range of different sizes on offer, in a key location to capitalise on Darwin's future growth, these commercial spaces have proven to be hot property in the Darwin commercial market.

Budget	\$2.8m
Client	CSG
Completion	2016
Size	1,600 sqm

As a warehouse based business with a need to fluently check in and out products, CSG's disjointed office and warehouse set up was hampering business efficiency.

Making use of Jaytex's specialty of custom design and construction, CSG took the opportunity to have their new premises designed around their business and completely optimised for their unique needs.

Space optimisation analysis was undertaken to increase efficiencies, reduce their footprint, and save costs. Location was also enhanced, maintaining their powerful corporate image.

The Jaytex team enjoy delivering the specialised needs required by purpose-built developments. The efficient and striking designs they create bring clients' visions to life and express the culture of innovation and quality cultivated at Jaytex.

645 STUART HIGHWAY, BERRIMAH

CSG

639 STUART HIGHWAY, BERRIMAH

RSEA

Budget	\$5.2m
Client	RSEA
Completion	2014
Size	800 sqm

RSEA were a client that knew what they wanted, down to the tiniest detail. As a new franchise to Darwin Jaytex worked closely with RSEA to deliver a showroom (1000m²), warehouse (600m²) and office (200m²) building to their exact specifications, infused with local knowledge and understanding.

RSEA saw the strategic benefit of the land position and approached Jaytex knowing their familiarity of the area and ease of process that they offer. The continuity of service and relationship Jaytex offer, where clients can deal with one person, allows for deeper understanding, straightforward process and effective collaboration. You ask for it done – we get it done. Nothing more to it.

Particular attention was given to bulky goods access and warehouse racking efficiency to ensure a high-functioning end result. A stunning polished concrete floor sets the tone and grandeur of the showroom, and with Stuart Highway frontage it is ideally situated. Built on time and on budget, with a stand-out finish, Jaytex proves its attention to detail and respect for quality.

Budget	\$1.8m
Client	Territory Generation
Completion	2016
Size	1,200 sqm

Territory Generation are the Northern Territory's power. This government owned electricity producer has unique requirements for constant air-conditioning to a secure control room, uninterrupted power supply and strict security.

Jaytex worked closely with the client, and within their tight requirements, to achieve an outstanding result. Our particular expertise in office planning allowed us to contribute to the design process, adding value by providing recommendations on the best use of space and delivering the best result for the client.
